

1. A recent statistics class had the following percentage scores on their final exam.

69	71	96	80	86	99	59	78
79	64	83	81	76	81	84	66
82	74	86	87	79	91	84	70

Create a frequency distribution for letter grades on the final.

Grade Range (Letter)	Frequency (Count)	Relative Frequency (Round to 1 decimal place)
A (90+)	3	12.5%
B (80-89)	10	41.7%
C (70-79)	7	29.2%
D (60-69)	3	12.5%
E (0-59)	1	4.2%

2. Use the data in the table above to construct a histogram of the data. Be sure to label the graph and axes appropriately.
