Calculus with Polar Coordinates

Tangent lines (<https://tutorial.math.lamar.edu/classes/calci/polartangents.aspx>)

Arc Length and Area (7.4)

Slope of the tangent line in polar coordinates.

The formula is taken from the idea of a slope of the tangent line in parametric coordinates:

$$\frac{dy}{dx} = \frac{\frac{dy}{dt}}{\frac{dx}{dt}}$$

Where t is the parameter. And for this application, we will treat θ as our parameter.

$$\frac{dy}{dx} = \frac{\frac{dy}{d\theta}}{\frac{dx}{d\theta}}$$

We also know that $x = r \cos \theta$, $y = r \sin \theta$ and r is a function of θ . i.e. $r(\theta)$

To find $\frac{dy}{d\theta}$, think of $y = r(\theta) \sin \theta$. To get this derivative we need to apply the product rule and differentiate implicitly.

Similarly for $\frac{dx}{d\theta}$.

$$\frac{dy}{dx} = \frac{r' \sin \theta + r \cos \theta}{r' \cos \theta - r \sin \theta}$$

Example.

Find the slope of the tangent line on the function $r = 3 + 8 \sin \theta$, $\theta = \frac{\pi}{6}$.

$$\frac{dy}{dx} = \frac{(8 \cos \theta) \sin \theta + (3 + 8 \sin \theta) \cos \theta}{(8 \cos \theta) \cos \theta - (3 + 8 \sin \theta) \sin \theta} = \frac{8 \sin \theta \cos \theta + 3 \cos \theta + 8 \sin \theta \cos \theta}{8 \cos^2 \theta - 3 \sin \theta - 8 \sin^2 \theta} =$$

$$\frac{3 \cos \theta + 16 \sin \theta \cos \theta}{8 \cos^2 \theta - 3 \sin \theta - 8 \sin^2 \theta}$$

$$\frac{dy}{dx} \left[\theta = \frac{\pi}{6} \right] = \frac{3 \left(\frac{\sqrt{3}}{2} \right) + 16 \left(\frac{1}{2} \right) \left(\frac{\sqrt{3}}{2} \right)}{8 \left(\frac{\sqrt{3}}{2} \right)^2 - 3 \left(\frac{1}{2} \right) - 8 \left(\frac{1}{2} \right)^2} = \frac{\left(\frac{11\sqrt{3}}{2} \right)}{6 - \frac{3}{2} - 2} = \frac{\left(\frac{11\sqrt{3}}{2} \right)}{\left(\frac{5}{2} \right)} = \frac{11\sqrt{3}}{5}$$

If we wanted to continue to find the equation of the tangent line:

$$r \left(\frac{\pi}{6} \right) = 3 + 8 \left(\frac{1}{2} \right) = 3 + 4 = 7$$

$$\left(7, \frac{\pi}{6}\right)$$

$$x = r \cos \theta, y = r \sin \theta$$

$$\left(7\left(\frac{\sqrt{3}}{2}\right), 7\left(\frac{1}{2}\right)\right) = \left(\frac{7\sqrt{3}}{2}, \frac{7}{2}\right)$$

$$y - y_1 = m(x - x_1)$$

$$y - \frac{7}{2} = \frac{11\sqrt{3}}{5}\left(x - \frac{7\sqrt{3}}{2}\right)$$

Arc length

In parametric form:

$$s = \int_a^b \sqrt{\left(\frac{dy}{dt}\right)^2 + \left(\frac{dx}{dt}\right)^2} dt$$

$x = r \cos \theta, y = r \sin \theta$ with θ as the parameter, and $r(\theta)$

In polar form, a and b are angles.

$$s = \int_a^b \sqrt{(r' \sin \theta + r \cos \theta)^2 + (r' \cos \theta - r \sin \theta)^2} d\theta =$$

$$\int_a^b \sqrt{(r')^2 \sin^2 \theta + r' r \sin \theta \cos \theta + r^2 \cos^2 \theta + (r')^2 \cos^2 \theta - r' r \cos \theta \sin \theta + r^2 \sin^2 \theta} d\theta =$$

$$\int_a^b \sqrt{(r')^2 \sin^2 \theta + (r')^2 \cos^2 \theta + r^2 \cos^2 \theta + r^2 \sin^2 \theta} d\theta =$$

$$\int_a^b \sqrt{(r')^2 (\sin^2 \theta + \cos^2 \theta) + r^2 (\cos^2 \theta + \sin^2 \theta)} d\theta =$$

$$\int_a^b \sqrt{(r')^2 + r^2} d\theta$$

Example.

Find the length of arc of $r = 2 + 2 \cos \theta$ (cardioid)

Use symmetry when possible.

$$r' = -2 \sin \theta$$

$$s = \int_a^b \sqrt{(r')^2 + r^2} d\theta = 2 \int_0^\pi \sqrt{(-2 \sin \theta)^2 + (2 + 2 \cos \theta)^2} d\theta =$$

$$2 \int_0^\pi \sqrt{4 \sin^2 \theta + 4 + 8 \cos \theta + 4 \cos^2 \theta} d\theta =$$

$$2 \int_0^\pi \sqrt{4 + 4 + 8 \cos \theta} d\theta = 2 \int_0^\pi \sqrt{8 + 8 \cos \theta} d\theta = 2\sqrt{8} \int_0^\pi \sqrt{1 + \cos \theta} d\theta =$$

$$1 + \cos \theta = 2 \sin^2 \frac{\theta}{2}$$

$$2\sqrt{8} \int_0^\pi \sqrt{2 \sin^2 \frac{\theta}{2}} d\theta = 2\sqrt{8}\sqrt{2} \int_0^\pi \sqrt{\sin^2 \frac{\theta}{2}} d\theta = 2\sqrt{16} \int_0^\pi \left| \sin \frac{\theta}{2} \right| d\theta =$$

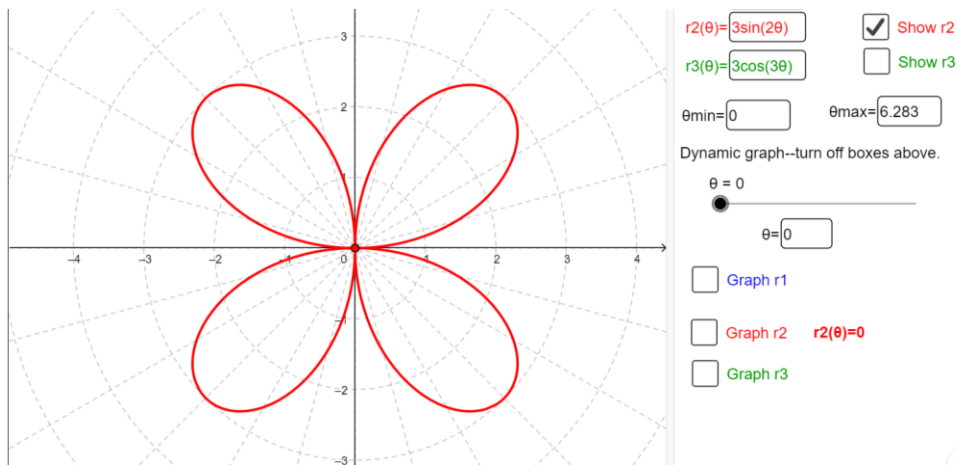

$$8 \left(-\cos \frac{\theta}{2} \right) (2) \Big|_0^\pi = 16(-0) - 16(-1) = 16$$

Area in polar graphs.

$$A = \frac{1}{2} \int_a^b [r(\theta)]^2 d\theta$$

Example.

Find the area of one petal of the graph $r(\theta) = 3 \sin 2\theta$.

$$\begin{aligned}
 3 \sin 2\theta &= 0 \\
 \sin 2\theta &= 0 \\
 2\theta &= 0, \pi, 2\pi, \dots \\
 \theta &= 0, \frac{\pi}{2}, \pi, \dots
 \end{aligned}$$

$$\begin{aligned}
 A &= \frac{1}{2} \int_0^{\frac{\pi}{2}} (3 \sin 2\theta)^2 d\theta = \frac{1}{2} \int_0^{\frac{\pi}{2}} 9 \sin^2 2\theta d\theta = \frac{9}{2} \int_0^{\frac{\pi}{2}} \frac{1}{2} (1 - \cos 4\theta) d\theta = \\
 &= \frac{9}{4} \int_0^{\frac{\pi}{2}} (1 - \cos 4\theta) d\theta = \frac{9}{4} \left[\theta - \frac{1}{4} \sin 4\theta \right]_0^{\pi/2} = \frac{9}{4} \left(\frac{\pi}{2} \right) = \frac{9\pi}{8}
 \end{aligned}$$

Multiply by 4 to get the area bounded by the entire graph.

Example.

Find the area outside the cardioid $r = 2 + 2 \sin \theta$ and inside the circle $r = 6 \sin \theta$.

$$2 + 2 \sin \theta = 6 \sin \theta$$

$$2 = 4 \sin \theta$$

$$\frac{1}{2} = \sin \theta$$

$$\theta = \frac{\pi}{6}, \frac{5\pi}{6}$$

$$A = \frac{1}{2} \int_{\frac{\pi}{6}}^{\frac{5\pi}{6}} (6 \sin \theta)^2 - (2 + 2 \sin \theta)^2 d\theta = \frac{2}{2} \int_{\frac{\pi}{6}}^{\frac{\pi}{2}} (6 \sin \theta)^2 - (2 + 2 \sin \theta)^2 d\theta =$$

$$\int_{\frac{\pi}{6}}^{\frac{\pi}{2}} 36 \sin^2 \theta - (4 + 8 \sin \theta + 4 \sin^2 \theta) d\theta = \int_{\frac{\pi}{6}}^{\frac{\pi}{2}} 36 \sin^2 \theta - 4 - 8 \sin \theta - 4 \sin^2 \theta d\theta =$$

$$\int_{\frac{\pi}{6}}^{\frac{\pi}{2}} 32 \sin^2 \theta - 4 - 8 \sin \theta d\theta = \int_{\frac{\pi}{6}}^{\frac{\pi}{2}} 32 \left(\frac{1}{2}\right) (1 - \cos 2\theta) - 4 - 8 \sin \theta d\theta =$$

$$\int_{\frac{\pi}{6}}^{\frac{\pi}{2}} 16(1 - \cos 2\theta) - 4 - 8 \sin \theta d\theta = \int_{\frac{\pi}{6}}^{\frac{\pi}{2}} 16 - 16 \cos 2\theta - 4 - 8 \sin \theta d\theta =$$

$$\int_{\frac{\pi}{6}}^{\frac{\pi}{2}} 12 - 16 \cos 2\theta - 8 \sin \theta d\theta = 12\theta - 8 \sin 2\theta + 8 \cos \theta \Big|_{\frac{\pi}{6}}^{\frac{\pi}{2}} =$$

$$12 \left(\frac{\pi}{2}\right) - 12 \left(\frac{\pi}{6}\right) - 0 + 0 + \frac{8\sqrt{3}}{2} - 8 \frac{\sqrt{3}}{2} = 6\pi - 2\pi = 4\pi$$

Next time: conic sections.

Review conic sections in rectangular coordinates.
